1.3.3	Vendor List	51

1 Vendor Associations

The Vendor Associations branch node of the Vendor Management navigation tree allows users to record vendor associations with owners, chains, and wholesalers.

1.1 Owners

The Owners screens allow users to create and maintain owners. They include three screens: Owner/ACH Information, Address/Contacts and Chain/Vendor Lists.

1.1.1 Owner/ACH Information

The Owner/ACH Information screen is used to maintain basic information about the owner/ACH of a WIC vendor, such as the ownership type, owner/ACH name, and, for users with the proper security access, ACH Data.

> *Vendor Associations* > *Owners* > *Owner/ACH Information*

Control	Description	
Owners	This is the record selector for the owner records. The drop-down and spin control allow selection of other owner/ACH records.	
	Type	Record Selector
	Contents	Owner Names
	Code ID	Owner table lookup

Control	Description			
New	Clicking the New command button creates a new owner/ACH record.			
	Type	Command Button		
	Hot Key	Alt + N		
Edit	Clicking the Edit command button enables all fields within the owner/ACH screen for update.			
	Type	Command Button		
	Hot Key	Alt + T		
Show All	Determines records shown in Owners record selector. Unchecked shows active owners. Check to expand the owner to all owners (active and inactive). Defaults to unchecked.			
	Type	Check Box		
	Display Only	No	Calculated	No
Deactivate	A checkbox used to indicate that the owner is deactivated.			
	Type	Checkbox		
	DB Column	VendorOwner.Status		
Name	The name of the organization or person that owns a vendor.			
	Type	Text Box		
	Required	Yes		
	Length	50		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	VendorOwner.Name		
Vendor Owner Alias Name	An alias for the Vendor Owner Name. It cannot be equal to the Name.			
	Type	Text Box		
	Required	No		
	Length	50		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	VendorOwner.AliasName		

Control	Description			
Ownership Type	This describes the type of ownership between an owner/ACH and a vendor (For example - Independent, Franchise/Private).			
	Type	List Box		
	Required	Yes		
	DB Column	VendorOwner.OwnershipTypeCd		
	Code ID	Vendor Ownership		
Business Phone Number	The owner's/ACH 10-digit business telephone number, including area code. The first field is the area code. If the Default Area Code system parameter contains a value, that value is placed into the area code field by default.			
	Type	Text Box		
	Required	Yes		
	Length	10		
	Validation	Numeric and Complete, Mask of (999) 999-9999		
	Display Only	No	Calculated	No
	DB Column	VendorOwner.BusinessAreaCode VendorOwner.BusPhoneNr		
Ext	The owner/ACH contact's telephone extension.			
	Type	Text Box		
	Required	No		
	Length	5		
	Validation	Numeric		
	Display Only	No	Calculated	No
	DB Column	VendorOwner.BusPhoneExt		
Business Fax Number	The owner's/ACH 10-digit business fax number, including area code. The first field is the area code. If the Default Area Code system parameter contains a value, that value is placed into the area code field by default.			
	Type	Text Box		
	Required	No		
	Length	10		
	Validation	Numeric and Complete, Mask of (999) 999-9999		
	Display Only	No	Calculated	No
	DB Column	VendorOwner.BusFaxAreaCd VendorOwner.BusFaxNr		

Control	Description			
Email Address	The owner/ACH contact's email address. The address must contain [@] and [.].			
	Type	Text Box		
	Required	No		
	Length	50		
	Validation	xxxx@xxx.xxx , "@" and "." must be present.		
	Display Only	No	Calculated	No
	DB Column	VendorOwner.EmailAddress		
Tax ID	Contains the Federal Tax ID of the owner/ACH.			
	Type	Text Box		
	Required	No		
	Length	15		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	VendorOwner.TaxID		
Automated Clearing House	Group box that contains the Owner's Automated Clearing House information. The group box is only available for users that have been assigned to the appropriate role that allows access to the ACH information.			
Bank Name	The name of the owner's/ACH bank used when processing automated clearing house transactions.			
	Type	Text Box		
	Required	Yes, if a corresponding Vendor uses the ACH Data.		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	VendorOwner.ACHBankName		

Control	Description			
Routing Number	The routing number of the owner's/ACH bank used when processing automated clearing house transactions.			
	Type	Text Box		
	Required	Yes, if a corresponding Vendor uses the ACH Data.		
	Length	9		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	VendorOwner.ACHRoutingNumber		
Account Number	The bank account number of the owner's/ACH bank used when processing automated clearing house transactions			
	Type	Text Box		
	Required	Yes, if a corresponding Vendor uses the ACH Data.		
	Length	17		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	VendorOwner.ACHAccountNumber		
Comments	Comments relating to the Owner/ACH.			
	Type	Multi Line Text Box		
	Required	No		
	Display Only	No	Calculated	No
	DB Column	VendorOwner.Comment		
<Last Modified By User and Date>	In the lower right-hand corner, the user and the date of the last update of the owner record are displayed.			
	Type	Text Box		
	Required	No		
	Length	NA		
	Validation	Mask of 'firstname lastname mm/dd/yyyy'		
	Display Only	Yes	Calculated	No
	DB Column	VendorOwner.ModifyStfpID + VendorOwner.ModifyDt		

Business Rules
<ol style="list-style-type: none"> 1. An owner cannot be deactivated unless all associated stores have a latest status of "Ineligible", "Disqualified", "Closed" or "Terminated". 2. An owner cannot be deactivated if there is an active chain attached to it. 3. <Deleted>. 4. The Name cannot equal the Vendor Owner Alias Name. Display error. 5. If the Vendor Owner Alias Name exists for another Owner Name, display warning. 6. If the Vendor Owner Alias Name exists for another Vendor Owner Alias Name, display warning. 7. The Automated Clearing House Data cannot be deleted and saved if a corresponding vendor uses the data. Display error.
Developer Notes
<ol style="list-style-type: none"> 1. If the VendorOwner.Status = 'D,' display a check in the Deactivate checkbox.

1.1.2 Address/Contacts

The Address/Contacts screen is used to create or maintain owner address and contact information.

Control	Description		
Owners/ACH	This is the record selector for the owner records. The drop-down and spin control allow selection of other owner/ACH records.		
	Type	Record Selector	
	Contents	Owner Names	
	DB Column	VendorOwner.Name	
Address Types	This is the record selector for the Address Types that are available to be associated with an Owner. The drop-down and spin control allow selection of other Address Types.		
	Type	Record Selector	
	Contents	Address Types	
	DB Column	OwnerAddress.AddressTypeCd	
New	Clicking the New command button creates a new address record for the address type selected for the displayed owner.		
	Type	Command Button	
	Hot Key	Alt + N	
Edit	Clicking the Edit button enables all fields within the owners screen for update.		
	Type	Command Button	
	Hot Key	Alt + T	
Delete	Clicking the Delete command button deletes the selected Address Type for the displayed owner.		
	Type	Command Button	
	Hot Key	Alt + D	
Show All Owners	Determines records shown in Owners record selector. Unchecked shows active owners. Check to expand the selection to all owners (active and inactive). Defaults to unchecked.		
	Type	Check Box	
	Display Only	No	Calculated

Control	Description			
Address Types on File	Address Types on File is used to indicate the types of addresses on file for the displayed owner/ACH. The available rows are determined by the Code ID. The address types on file are indicated by the checkbox being checked.			
	Type	Read Only List Box		
	Required	NA		
	Code ID	Address Type This code element is editable but these installed values are non-editable: Physical Mailing		
Address Type	These are the Address Types that are available to be associated with an Owner.			
	Type	List Box		
	Required	Yes		
	DB Column	OwnerAddress.AddressTypeCd		
	Code ID	Address Type This code element is editable but these installed values are non-editable: Physical Mailing		
Address Line 1	The first line of the owner/ACH address. Either Address Line 1 must contain a value or P.O. Box must contain a value to have a valid address.			
	Type	Text Box		
	Required	Yes – If no data in PO Box		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	OwnerAddress.StreetAddrLine1		
Address Line 2	The second, optional line of an owner/ACH address. It cannot contain data if Address Line 1 is blank.			
	Type	Text Box		
	Required	No		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	OwnerAddress.StreetAddrLine2		

Control	Description			
Location	Location is where additional information regarding the location of the owner, such as cross streets, can be stored.			
	Type	Text Box		
	Required	No		
	Length	50		
	Validation	None		
	Display Only	No	Calculated	No
	DB Column	OwnerAddress.Location		
Suite	The suite number of an owner/ACH address.			
	Type	Text Box		
	Required	No		
	Length	5		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	OwnerAddress.Suite		
P.O. Box	The Post Office Box number of an owner/ACH address. Either Address Line 1 must contain a value or P.O. Box must contain a value in order to have a valid mailing address. This field is disabled if the Address Type = "Physical."			
	Type	Text Box		
	Required	Yes – If no data in address line 1		
	Length	5		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	OwnerAddress.POBox		
City	The City component of the owner/ACH address. When a valid ZIP Code is entered, the City is automatically populated based on the ZIP Code. If a valid ZIP Code has more than one possible City, the choices are displayed in a pop-up window where the user must select the correct value.			
	Type	Text Box		
	Required	Yes		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	OwnerAddress.City		

Control	Description			
State	The State field identifies the state of the owner/ACH address. When a valid ZIP Code is entered, the State is automatically populated based on the ZIP Code.			
	Type	List Box		
	Required	Yes		
	DB Column	OwnerAddress.State		
	Code ID	State table lookup		
Zip Code	The 5-digit ZIP Code of the owner/ACH address. When a valid ZIP Code is entered, the City, State and County fields are automatically populated based on the ZIP Code. If a valid ZIP Code has more than one possible City and/or County value, the choices are displayed in a pop-up window where the user must select the correct value.			
	Type	Text Box		
	Required	Yes		
	Length	5		
	Validation	Numeric and Complete		
	Display Only	No	Calculated	No
	DB Column	OwnerAddress.ZipCode		
(+4)	The optional, 4-digit ZIP Code extension of an owner/ACH address.			
	Type	Text Box		
	Required	No		
	Length	4		
	Validation	Numeric and Complete		
	Display Only	No	Calculated	No
	DB Column	OwnerAddress.ZipPlus4		
County	The county where the owner/ACH is located. When a valid ZIP Code is entered, the County field is automatically populated based on the ZIP Code. If a valid ZIP Code has more than one possible County, the choices are displayed in a pop-up window where the user must select the correct value.			
	Type	List Box		
	Required	Yes		
	DB Column	OwnerAddress.CountyNm		
	Code ID	County table lookup		

Control	Description			
Contact Information-Add Row	Clicking the Add Row command button creates a new row in the contacts data grid allowing the user to complete the information about the owner/ACH contact.			
	Type	Command Button		
	Hot Key	Alt + A		
Contact Information-Remove Row	Clicking the Remove Row command button removes the selected row from the data grid and marks the currently selected row (arrow pointer) as deleted in the database.			
	Type	Command Button		
	Hot Key	Alt + R		
Contact Information	Data grid that contains the contact information for the selected owner/ACH.			
	Type	Data Grid		
	Display Only	No	Calculated	No
	DB Column	NA		
First Name	The first name of the contact for the selected owner/ACH.			
	Type	Text Box		
	Required	Yes		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	OwnerContact.FirstName		
Last Name	The last name of the contact for the selected owner/ACH.			
	Type	Text Box		
	Required	Yes		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	OwnerContact.LastName		

Control	Description			
Type	Type is used to select the type of contact being entered for the owner/ACH. Types include: Primary, and others as designated.			
	Type	List Box		
	Required	Yes		
	DB Column	OwnerContact.ContactTypeCd		
	Code ID	Contact Type This code element is editable but these installed values are non-editable: Primary		
Title	The title given to the contact person for the selected owner/ACH and contact type.			
	Type	Text Box		
	Required	Yes		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	OwnerContact.ContactTitle		
Phone Number	The owner's/ACH 10-digit business phone number, including area code. The first field is the area code. If the Default Area Code system parameter contains a value, that value is placed into the area code field by default. .			
	Type	Text Box		
	Required	No		
	Length	10		
	Validation	Numeric and Complete, Mask of (999) 999-9999		
	Display Only	No	Calculated	No
	DB Column	OwnerContact.BusPhoneAreaCd + OwnerContact.BusPhoneNr		

Control	Description			
Fax Number	The owner's/ACH 10-digit fax number, including area code. The first field is the area code. If the Default Area Code system parameter contains a value, that value is placed into the area code field by default.			
	Type	Text Box		
	Required	No		
	Length	10		
	Validation	Numeric and Complete, Mask of (999) 999-9999		
	Display Only	No	Calculated	No
	DB Column	OwnerContact.BusFaxAreaCd + OwnerContact.BusFaxNr		
Email Address	The email address of the contact for the selected owner/ACH and contact type.			
	Type	Text Box		
	Required	No		
	Length	50		
	Validation	xxxx@xxx.xxx , "@" and "." must be present		
	Display Only	No	Calculated	No
	DB Column	OwnerContact.EmailAddress		
Address Type	Address Type is used to select the type of address being entered of the contact for the selected owner/ACH and contact type. Types include Physical and Mailing.			
	Type	List Box		
	Required	Yes		
	DB Column	OwnerContact.AddressTypeCd		
	Code ID	Address Type This code element is editable but these installed values are non-editable: Physical Mailing		

Business Rules

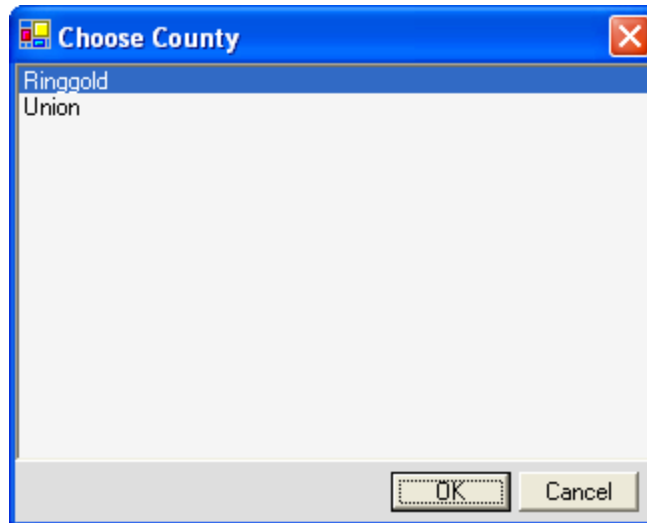

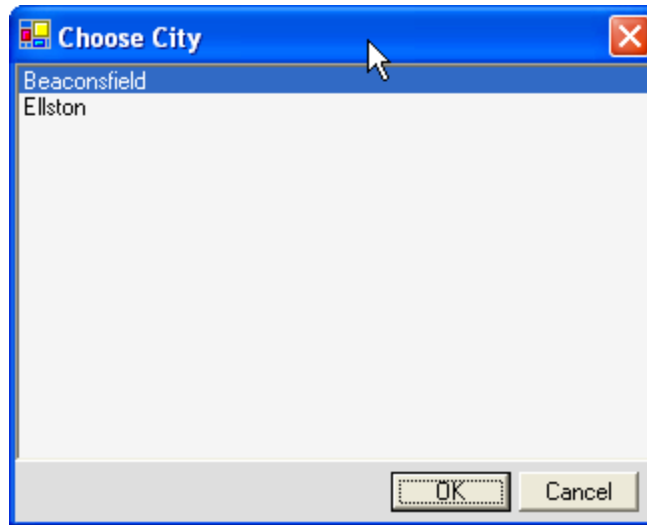

1. Tab order for address goes from Address Line 1 to the zip code field. This tab order allows the user to use the automatic zip code database that is incorporated in the data system.
2. Either Street Address Line 1 or P.O. Box must be present for a valid address.
3. Must show pop-up window when the zip code entered contains more than one city or county. Refer to the Choose City/County/State Pop-Up Windows section.
4. Always default to the physical address, if one exists. If no physical address exists, default to the mailing address; otherwise display in the Sort Order of the Address Type Code.
5. If an address type in the Contact Information grid is selected that does not have a corresponding address in the address area, display error. For example, if Mailing is selected, but no Mailing address is present, display error.
6. If the address type for a selected address changes and there is a corresponding contact for the address type in the contacts grid, display error. For example, if an address type is changed from being a Mailing address to a Physical address, and there is a contact for the Mailing address in the contacts grid, display error.
7. If the address type for a selected address changes and there is a corresponding vendor that uses the owner's address as its own, the address type cannot be changed. Display error. For example, if an address type is changed from being a Mailing address to a Physical address, and there is a vendor that uses the owner's Mailing address as its own, display error.
8. Street Address Line 2 cannot contain data if Street Address Line 1 is blank. Display error.
9. Display error if an Address Type is being added that already exists for the Owner.
10. Display error if an Address Type is being changed to an Address Type that already exists for the Owner.

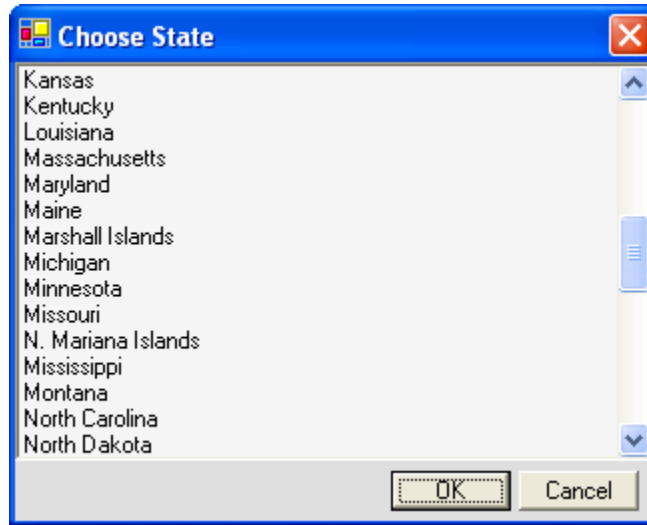

Developer Notes

1. Each address type entered is placed into the address collection for the owner/ACH. When the Address Type Codes list is displayed, place a check in each address type where appropriate.
2. There are no historical records for the addresses. When an edit is done on an existing address the data is replaced within the database records.

1.1.2.1 Choose City/County/State Pop-Ups

The Choose City/County/State Pop-up windows allow the user to select which city/county/State the owner/ACH should be associated with. Within the ZIP+4 data base, some zip codes cover multiple cities or counties. These pop-up windows will also be displayed when necessary on the Chain and Wholesaler Information screens.

1.1.3 Chains/Vendor Lists

The chain list grid contains a list of all chains that have an association with the selected owner. The data grid is read-only and shows the Chain ID, Chain name, street address, city, chain status and the number of active vendors associated with the chain.

The non-chain vendors grid contains a list of all vendors that have an association with the selected owner that are not part of a chain. The data grid is read-only and shows the Vendor ID, Vendor Name, street address, city, local agency, and vendor status.

Control	Description			
Vendor ID	The vendor's unique identifier. By clicking on the hyperlink the vendor is displayed within vendor management.			
	Format	Link	Calculated	No
	DB Column	Vendor.FFVendorID		
Vendor Name	The vendor's name.			
	Format	Text	Calculated	No
	DB Column	Vendor.StoreName		
Address	The street address where the vendor is located.			
	Format	Text	Calculated	No
	DB Column	VendorAddress.StreetAddrLine1		
City	The city where the vendor is located.			
	Format	Text	Calculated	No
	DB Column	VendorAddress.City		
Local Agency ID	The local agency that is associated with the vendor.			
	Format	Text	Calculated	No
	DB Column	LocalAgency.FFLocalAgencyID		
Status	The vendor's current status.			
	Format	Text	Calculated	No
	DB Column	VendorStatus.VendorStatusCd		

Business Rules
<ol style="list-style-type: none"> 1. The chain list data grid is populated with all chains that are linked to the designated owner/ACH. 2. The non-chain vendors data grid is populated with all vendors that are linked to the designated owner/ACH and not to a chain. 3. Address data displayed is the physical address data, if one exists. If no physical address exists, the mailing address is displayed; otherwise the next address type in the Sort Order of the Address Type Code is displayed.

Developer Notes
<ol style="list-style-type: none"> 1. The Number of Vendors field in the chain list data grid is the number of active vendors associated with the chain. 2. To display the Local Agency ID, look at the Local Agency ID that is stored in the Vendor.LA_ID, and then find the corresponding Local Agency ID on the LocalAgency table.

1.2 Chains

The Chains screens allow users to create, maintain and deactivate vendor chains. They include three screens: Chain Information, Address/Contacts and Vendor List.

1.2.1 Chain Information

The Chain Information screen is used to maintain basic information about the chain of a WIC vendor, such as the type, chain name and, for users with the proper security access, ACH Data.

> *Vendor Associations* > *Chains* > *Chain Information*

The screenshot shows a web-based form for editing chain information. At the top, there is a dropdown menu showing '18 - George Smith's' and navigation controls for '1 of 99' records, along with 'New' and 'Edit' buttons. Below this, there are several input fields: 'Name' (George Smith's), 'Chain ID' (18), 'Chain Type' (Independent), 'Business Phone Number' ((717) 691-5500), 'Business Fax Number' ((717) 691-5510), 'Email Address' (gsmith@store.com), 'Tax ID' (5478002353), and 'Owner' (Smith Incorporated). A dashed box encloses the 'Automated Clearing House' section, which contains 'Bank Name' (Bank Of America), 'Routing Number' (003987501), and 'Account Number' (145679846568). There are also checkboxes for 'Show All' and 'Deactivate'.

Control	Description	
Chains	This is the record selector for all the chain records.	
	Type	Record Selector
	Contents	Concatenation of Chain IDs and Chain Names
	DB Column	VendorChain.FFChainID, VendorChain.Name
New	Clicking the New command button creates a new chain record.	
	Type	Command Button
	Hot Key	Alt + N
Edit	Clicking the Edit command button enables all fields within the chain screen for update.	
	Type	Command Button
	Hot Key	Alt + T

Control	Description			
Show All	Determines records shown in Chains record selector. Unchecked shows active chains. Check to expand the selection to all chains (active and inactive). Defaults to unchecked.			
	Type	Check Box		
	Display Only	No	Calculated	No
Deactivate	A checkbox used to indicate that the chain is deactivated.			
	Type	Checkbox		
	DB Column	VendorChain.Status		
Name	The name of the chain of the vendor. It must be unique.			
	Type	Text Box		
	Required	Yes		
	Length	50		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	VendorChain.Name		
Chain ID	Contains the Chain ID number of the chain.			
	Type	Text Box		
	Required	Yes		
	Length	2		
	Validation	Numeric		
	Display Only	No	Calculated	No
	DB Column	VendorChain.FFChainID		
Chain Type	This describes the type between a chain and a vendor.			
	Type	List Box		
	Required	Yes		
	DB Column	VendorChain.ChainTypeCd		
	Code ID	Chain Type		

Control	Description			
Business Phone Number	The chain's 10-digit business telephone number, including area code. The first field is the area code. If the Default Area Code system parameter contains a value, that value is placed into the area code field by default.			
	Type	Text Box		
	Required	Yes		
	Length	10		
	Validation	Numeric and Complete, Mask of (999) 999-9999		
	Display Only	No	Calculated	No
	DB Column	VendorChain.BusinessAreaCode + VendorChain.BusPhoneNr		
Ext	The chain contact's telephone extension.			
	Type	Text Box		
	Required	No		
	Length	5		
	Validation	Numeric		
	Display Only	No	Calculated	No
	DB Column	VendorChain.BusPhoneExt		
Business Fax Number	The chain's 10-digit business fax number, including area code. The first field is the area code. If the Default Area Code system parameter contains a value, that value is placed into the area code field by default.			
	Type	Text Box		
	Required	No		
	Length	10		
	Validation	Numeric and Complete, Mask of (999) 999-9999		
	Display Only	No	Calculated	No
	DB Column	VendorChain.BusFaxAreaCd + VendorChain.BusFaxNr		

Control	Description			
Email Address	The chain contact's email address. The address must contain [@] and [.].			
	Type	Text Box		
	Required	No		
	Length	50		
	Validation	xxxx@xxx.xxx . "@" and "." must be present		
	Display Only	No	Calculated	No
	DB Column	VendorChain.EmailAddress		
Tax ID	Contains the Federal Tax ID of the chain.			
	Type	Text Box		
	Required	No		
	Length	15		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	VendorChain.TaxID		
Owner	List box containing active owners that can be selected and associated with the chain.			
	Type	List Box		
	Required	No		
	DB Column	VendorChain.Owner_ID		
	Code ID	VendorOwner table lookup		
Automated Clearing House	Group box that contains the Chain's Automated Clearing House information. The group box is only available for users that have been assigned to the appropriate role that allows access to the ACH information.			
Bank Name	The name of the chain's bank used when processing automated clearing house transactions.			
	Type	Text Box		
	Required	No		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	VendorChain.ACHBankName		

Control	Description			
Routing Number	The routing number of the chain's bank used when processing automated clearing house transactions.			
	Type	Text Box		
	Required	No		
	Length	9		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	VendorChain.ACHRoutingNumber		
Account Number	The bank account number of the chain's bank. It is used when processing automated clearing house transactions.			
	Type	Text Box		
	Required	No		
	Length	17		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	VendorChain.ACHAccountNumber		
<Last Modified By User and Date>	In the lower right-hand corner, the user and the date of the last update of the chain information record are displayed.			
	Type	Text Box		
	Required	No		
	Length	NA		
	Validation	Mask of 'firstname lastname mm/dd/yyyy'		
	Display Only	Yes	Calculated	No
	DB Column	VendorChain.ModifyStfpID + VendorChain.ModifyDt		

Business Rules
<ol style="list-style-type: none"> 1. The chain name must be unique. Display error if duplicate name entered. 2. The Automated Clearing House Data cannot be deleted and saved if a corresponding vendor uses the data. Display error. 3. A chain cannot be deactivated unless all associated stores have a latest status of "Ineligible", "Disqualified", "Closed" or "Terminated". 4. The chain ID must be unique. Display error if duplicate entered.

Developer Notes
<ol style="list-style-type: none"> 1. If the VendorChain.Status = D, display a check in the Deactivate checkbox.

	DB Column VendorChain.FFChainID, VendorChain.Name
Address Types	This is the record selector for the Address Types that are available to be associated with a Chain. The drop-down and spin control allow selection of other Address Types.
	Type Record Selector
	Contents Address Types
	DB Column ChainAddress.AddressTypeCd

Control	Description			
New	Clicking the New command button creates a new address record for the address type selected for the displayed chain.			
	Type	Command Button		
	Hot Key	Alt + N		
Edit	Clicking the Edit button enables all fields within the chains screen for update.			
	Type	Command Button		
	Hot Key	Alt + T		
Delete	Clicking the Delete command button deletes the selected Address Type for the displayed chain.			
	Type	Command Button		
	Hot Key	Alt + D		
Show All Chains	Determines records shown in Chains record selector. Unchecked shows active chains. Check to expand the selection to all chains (active and inactive). Defaults to unchecked.			
	Type	Check Box		
	Display Only	No	Calculated	No
Address Types on File	Address Types on File is used to indicate the types of addresses on file for the displayed chain. The available rows are determined by the Code ID. The address types on file are indicated by the checkbox being checked.			
	Type	Read Only List Box		
	Required	NA		
	Code ID	Address Type This code element is editable but these installed values are non-editable: Physical Mailing		
Address Type	These are the Address Types that are available to be associated with a Chain.			
	Type	List Box		
	Required	Yes		
	DB Column	ChainAddress.AddressTypeCd		
	Code ID	Address Type This code element is editable but these installed values are non-editable: Physical Mailing		

Control	Description			
Address Line 1	The first line of the chain address. Either Address Line 1 must contain a value or P.O. Box must contain a value to have a valid address.			
	Type	Text Box		
	Required	Yes – If no data in PO Box		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	ChainAddress.StreetAddrLine1		
Address Line 2	The second, optional line of a chain address. It cannot contain data if Address Line 1 is blank.			
	Type	Text Box		
	Required	No		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	ChainAddress.StreetAddrLine2		
Location	Location is where additional information regarding the location of the Chain, such as cross streets, can be stored.			
	Type	Text Box		
	Required	No		
	Length	50		
	Validation	None		
	Display Only	No	Calculated	No
	DB Column	ChainAddress.Location		
Suite	The suite number of a chain address.			
	Type	Text Box		
	Required	No		
	Length	5		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	ChainAddress.Suite		

Control	Description			
P.O. Box	The Post Office Box number of a chain address. Either Address Line 1 must contain a value or P.O. Box must contain a value in order to have a valid mailing address. This field is disabled if the Address Type = "Physical."			
	Type	Text Box		
	Required	Yes – If no data in address line 1		
	Length	5		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	ChainAddress.POBox		
City	The City component of the chain address. When a valid ZIP Code is entered, the City is automatically populated based on the ZIP Code. If a valid ZIP Code has more than one possible City, the choices are displayed in a pop-up window where the user must select the correct value.			
	Type	Text Box		
	Required	Yes		
	Length	30

	Display Only	No	Calculated	No
	DB Column	ChainAddress.City		
State	The State field identifies the state of the chain address. When a valid ZIP Code is entered, the State is automatically populated based on the ZIP Code.			
	Type	List Box		
	Required	Yes		
	DB Column	ChainAddress.State		
	Code ID	State table lookup		

Control	Description			
Zip Code	The 5-digit ZIP Code of the chain address. When a valid ZIP Code is entered, the City, State and County fields are automatically populated based on the ZIP Code. If a valid ZIP Code has more than one possible City and/or County value, the choices are displayed in a pop-up window where the user must select the correct value.			
	Type	Text Box		
	Required	Yes		
	Length	5		
	Validation	Numeric and Complete		
	Display Only	No	Calculated	No
	DB Column	ChainAddress.ZipCode		
(+4)	The optional, 4-digit ZIP Code extension of a chain address.			
	Type	Text Box		
	Required	No		
	Length	4		
	Validation	Numeric and Complete		
	Display Only	No	Calculated	No
	DB Column	ChainAddress.ZipPlus4		
County	The county where the chain is located. When a valid ZIP Code is entered, the County field is automatically populated based on the ZIP Code. If a valid ZIP Code has more than one possible County, the choices are displayed in a pop-up window where the user must select the correct value.			
	Type	List Box		
	Required	Yes		
	DB Column	ChainAddress.CountyNm		
	Code ID	County table lookup		
Contact Information-Add Row	Clicking the Add Row command button creates a new row in the contacts data grid allowing the user to complete the information about the chain contact.			
	Type	Command Button		
	Hot Key	Alt + A		
Contact Information-Remove Row	Clicking the Remove Row command button removes the selected row from the data grid and marks the currently selected row (arrow pointer) as deleted in the database.			
	Type	Command Button		
	Hot Key	Alt + R		

Control	Description			
Contact Information	Data grid that contains the contact information for the selected chain.			
	Type	Data Grid		
	Display Only	No	Calculated	No
	DB Column	NA		
First Name	The first name of the contact for the selected chain.			
	Type	Text Box		
	Required	Yes		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	ChainContact.FirstName		
Last Name	The last name of the contact for the selected chain.			
	Type	Text Box		
	Required	Yes		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	ChainContact.LastName		
Type	Type is used to select the type of contact being entered for the chain. Types include: Primary, and others as designated.			
	Type	List Box		
	Required	Yes		
	DB Column	ChainContact.ContactTypeCd		
	Code ID	Contact Type This code element is editable but these installed values are non-editable: Primary		

Control	Description			
Title	The title given to the contact person for the selected chain and contact type.			
	Type	Text Box		
	Required	Yes		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	ChainContact.ContactTitle		
Phone Number	The phone number of the contact for the selected chain and contact type. The first field is the area code. If the Default Area Code system parameter contains a value, that value is placed into the area code field by default.			
	Type	Text Box		
	Required	No		
	Length	10		
	Validation	Numeric and Complete, Mask of (999) 999-9999		
	Display Only	No	Calculated	No
	DB Column	ChainContact.BusPhoneAreaCd + ChainContact.BusPhoneNr		
Fax Number	The fax number of the contact for the selected chain and contact type. The first field is the area code. If the Default Area Code system parameter contains a value, that value is placed into the area code field by default.			
	Type	Text Box		
	Required	No		
	Length	10		
	Validation	Numeric and Complete, Mask of (999) 999-9999		
	Display Only	No	Calculated	No
	DB Column	ChainContact.BusFaxAreaCd + ChainContact BusFaxNr		

Control	Description			
Email Address	The email address of the contact for the selected chain and contact type. The address must contain [@] and [.]			
	Type	Text Box		
	Required	No		
	Length	50		
	Validation	xxxx@xxx.xxx , "@" and "." must be present		
	Display Only	No	Calculated	No
	DB Column	ChainContact.EmailAddress		
Address Type	Address Type is used to select the type of address being entered for the contact of the selected chain and contact type. Types include Physical and Mailing.			
	Type	List Box		
	Required	Yes		
	DB Column	ChainContact.AddressTypeCd		
	Code ID	Address Type This code element is editable but these installed values are non-editable: Physical Mailing		

Business Rules
<ol style="list-style-type: none"> 1. Tab order for address goes from Address Line 1 to the ZIP code field. This tab order allows the user to use the automatic zip code database that is incorporated in the data system. 2. Either Street Address Line 1 or P.O. Box must be present for a valid address. 3. Must show pop-up window when the zip code entered contains more than one city or county. Refer to the Choose City/County/State Pop-Up Windows section. 4. Always default to the physical address, if one exists. If no physical address exists, default to the mailing address; otherwise display in the Sort Order of the Address Type Code. 5. If the address type for a selected address changes and there is a corresponding contact for the address type in the contacts grid, display error. For example, if an address type is changed from being a Mailing address to a Physical address, and there is a contact for the Mailing address in the contacts grid, display error. 6. If an address type in the Contact Information grid is selected that does not have a corresponding address in the address area, display error. For example, if Mailing is selected, but no Mailing address is present, display error. 7. Street Address Line 2 cannot contain data if Street Address Line 1 is blank. Display error.

Business Rules
<p>8. If the address type for a selected address changes and there is a corresponding vendor that uses the chain's address as its own, the address type cannot be changed. Display error. For example, if an address type is changed from being a Mailing address to a Physical address, and there is a vendor that uses the chain's Mailing address as its own, display error.</p> <p>9. Display error if an Address Type is being added that already exists for the Chain.</p> <p>10. Display error if an Address Type is being changed to an Address Type that already exists for the Chain.</p>

Developer Notes
<p>1. Each address type entered is placed into the address collection for the chain. When the Address Types of File list is displayed, place a check in each address type where appropriate.</p> <p>2. There are no historical records for the addresses. When an edit is done on an existing address the data is replaced within the database records.</p>

1.2.3 Vendor List

The vendor list screen shows a list of all vendors that have an association with the selected chain. The data grid is read-only and shows the vendor ID, name, street address, city, local agency name, and vendor status.

> *Vendor Associations* > *Chains* > *Vendor List*

Chains < 1 of 99 >
 Show All

Current Vendors					
Vendor ID	Vendor Name	Address	City	Local Agency ID	Status
01228	Smith's Groceries	42 Main Street	Eagle	19	Active
06809	Smith's Grocery and Pharmacy	101 West Avenue	Eagle	19	Active
08001	Smith's Market	2359 Colorado Drive	Avon	19	Active

Control	Description			
Chains	This is the record selector for the chain records.			
	Type	Record Selector		
	Contents	Concatenation of Chain IDs and Chain Names		
	DB Column	VendorChain.FFChainID, VendorChain.Name		
Show All	Determines records shown in Chains record selector. Unchecked shows active chains. Check to expand the selection to all chains (active and inactive). Defaults to unchecked.			
	Type	Check Box		
	Display Only	No	Calculated	No
Current Vendors	Data grid that displays all vendors associated with the chain.			
	Type	Read-Only Data Grid		
	Display Only	Yes	Calculated	No
	DB Column	NA		
Vendor ID	The vendor's unique identifier. By clicking on the hyperlink the vendor is displayed within vendor management.			
	Format	Link	Calculated	No
	DB Column	Vendor.FFVendorID		
Vendor Name	The vendor's name.			
	Format	Text	Calculated	No
	DB Column	Vendor.StoreName		
Address	The street address where the vendor is located.			
	Format	Text	Calculated	No
	DB Column	VendorAddress.StreetAddrLine1		
City	The city where the vendor is located.			
	Format	Text	Calculated	No
	DB Column	VendorAddress.City		
Local Agency ID	The local agency that is associated with the vendor.			
	Format	Text	Calculated	No
	DB Column	LocalAgency.FFLocalAgencyID		
Status	The vendor's current status.			
	Format	Text	Calculated	No
	DB Column	VendorStatus.VendorStatusCd		
	Code ID	VendorStatusCode table lookup		

Business Rules
<ol style="list-style-type: none"> 1. The data grid is populated with all vendors that are linked to the designated chain. 2. Address data displayed is the physical address data, if one exists. If no physical address exists, the mailing address is displayed; otherwise the next address type in the Sort Order of the Address Type Code is displayed.

Developer Notes
<ol style="list-style-type: none"> 1. To display the Local Agency ID, look at the Local Agency ID that is stored in the Vendor.LA_ID, and then find the corresponding Local Agency ID on the LocalAgency table.

1.3 Wholesalers

The Wholesaler screens allow users to create, to maintain or to deactivate wholesaler suppliers to WIC approved vendors. They include Wholesaler Information, Addresses, Contacts and Vendor List.

1.3.1 Wholesaler Information

The Wholesaler Information screen is used to maintain basic information about the wholesalers, such as the Name, wholesaler type, and phone numbers.

> *Vendor Associations* > *Wholesalers* > *Wholesaler Information*

The screenshot shows a web form for editing a wholesaler. At the top, there is a breadcrumb trail: "Wholesalers" followed by a dropdown menu showing "John's Wholesalers". To the right of the dropdown are navigation icons: a left arrow, a box containing "1", the text "of 99", a right arrow, a plus icon, and buttons labeled "New" and "Edit". Below the breadcrumb is a "Show All" checkbox (checked) and a "Deactivate" checkbox (unchecked). The form fields are as follows:

- Name: John's Wholesalers
- Business Type: Three checked checkboxes for "Grocery", "Pharmacy", and "Formula".
- Business Phone Number: (717) 691-5500, Ext: 125
- Alternate Business Phone Number: (717) 691-5510, Ext: 125
- Business Fax Number: (717) 691-5510
- Email Address: gsmith@store.com
- Tax ID: 5478002353
- Business License Number: 003987501
- Business State: Colorado (dropdown menu)

Control	Description

	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	WholesalerAddress.POBox		
City	The City component of the wholesaler address. When a valid ZIP Code is entered, the City is automatically populated based on the ZIP Code. If a valid ZIP Code has more than one possible City, the choices are displayed in a pop-up window where the user must select the correct value.			
	Type	Text Box		
	Required	Yes		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	WholesalerAddress.City		
State	The State field identifies the state of the wholesaler address. When a valid ZIP Code is entered, the State is automatically populated based on the ZIP Code.			
	Type	List Box		
	Required	Yes		
	DB Column	WholesalerAddress.State		
	Code ID	State table lookup		

Control	Description			
Zip Code	The 5-digit ZIP Code of the wholesaler address. When a valid ZIP Code is entered, the City, State and County fields are automatically populated based on the ZIP Code. If a valid ZIP Code has more than one possible City and/or County value, the choices are displayed in a pop-up window where the user must select the correct value.			
	Type	Text Box		
	Required	Yes		
	Length	5		
	Validation	Numeric and Complete		
	Display Only	No	Calculated	No
	DB Column	WholesalerAddress.ZipCode		
(+4)	The optional, 4-digit ZIP Code extension of a wholesaler address.			
	Type	Text Box		
	Required	No		
	Length	4		
	Validation	Numeric and Complete		
	Display Only	No	Calculated	No
	DB Column	WholesalerAddress.ZipPlus4		
County	The county where the wholesaler is located. When a valid ZIP Code is entered, the County field is automatically populated based on the ZIP Code. If a valid ZIP Code has more than one possible County, the choices are displayed in a pop-up window where the user must select the correct value.			
	Type	List Box		
	Required	Yes		
	DB Column	WholesalerAddress.CountyNm		
	Code ID	County table lookup		
Add Row	Clicking the Add Row command button creates a new row in the contacts data grid allowing the user to complete the information about the wholesaler contact.			
	Type	Command Button		
	Hot Key	Alt + A		
Remove Row	Clicking the Remove Row command button removes the selected row from the data grid and marks the currently selected row (arrow pointer) as deleted in the database.			
	Type	Command Button		
	Hot Key	Alt + R		

Control	Description			
Contact Information	Data grid that contains the contact information for the selected Wholesaler.			
	Type	Data Grid		
	Display Only	No	Calculated	No
	DB Column	NA		
First Name	The first name of the contact for the selected wholesaler.			
	Type	Text Box		
	Required	No		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	WholesalerContact.FirstName		
Last Name	The last name of the contact for the selected wholesaler.			
	Type	Text Box		
	Required	No		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	WholesalerContact.LastName		
Type	Type is used to select the type of contact being entered for the wholesaler. Types include: Primary, and others as designated.			
	Type	List Box		
	Required	No		
	DB Column	WholesalerContact.ContactTypeCd		
	Code ID	Contact Type This code element is editable but these installed values are non-editable: Primary		

Control	Description			
Title	The title given to the contact person for the selected wholesaler and contact type.			
	Type	Text Box		
	Required	No		
	Length	30		
	Validation	NA		
	Display Only	No	Calculated	No
	DB Column	WholesalerContact.ContactTitle		
Phone Number	The phone number of the contact for the selected wholesaler and contact type. The first field is the area code. If the Default Area Code system parameter contains a value, that value is placed into the area code field by default.			
	Type	Text Box		
	Required	No		
	Length	10		
	Validation	Numeric and Complete, Mask of (999) 999-9999		
	Display Only	No	Calculated	No
	DB Column	WholesalerContact.BusPhoneAreaCd + WholesalerContact.BusPhoneNr		
Fax Number	The fax number of the contact for the selected chain and contact type. The first field is the area code. If the Default Area Code system parameter contains a value, that value is placed into the area code field by default.			
	Type	Text Box		
	Required	No		
	Length	10		
	Validation	Numeric and Complete, Mask of (999) 999-9999		
	Display Only	No	Calculated	No
	DB Column	WholesalerContact.BusFaxAreaCdNr + WholesalerContact.BusFaxPhoneNr		

Control	Description			
Email Address	The email address of the contact for the selected wholesaler and contact type. The address must contain [@] and [.].			
	Type	Text Box		
	Required	No		
	Length	50		
	Validation	xxxx@xxx.xxx , "@" and "." must be present.		
	Display Only	No	Calculated	No
	DB Column	WholesalerContact.EmailAddress		
Address Type	Address Type is used to select the type of address being entered of the contact for the selected wholesaler and contact type. Types include Physical and Mailing.			
	Type	List Box		
	Required	Yes		
	DB Column	WholesalerContact.AddressTypeCd		
	Code ID	Address Type This code element is editable but these installed values are non-editable: Physical Mailing		

Business Rules
<ol style="list-style-type: none"> 1. Tab order for address goes from Address Line 1 to the zip code field. This tab order allows the user to use the automatic ZIP code database that is incorporated in the data system. 2. Either Street Address Line 1 or P.O. Box must be present for a valid address. 3. Must show pop-up window when the zip code entered contains more than one city or county. Refer to the Choose City/County/State Pop-up Windows section. 4. The Address Types record selector defaults to the physical address, if one exists. If no physical address exists, default to the mailing address; otherwise display in the Sort Order of the Address Type Code. 5. Street Address Line 2 cannot contain data if Street Address Line 1 is blank. Display error. 6. If an address type in the Contact Information grid is selected that does not have a corresponding address in the address area, display error. For example, if Mailing is selected, but no Mailing address is present, display error. 7. If the address type for a selected address changes and there is a corresponding contact for the address type in the contacts grid, display error. For example, if an address type is changed from being a Mailing address to a Physical address, and there is a contact for the Mailing address in the contacts grid, display error. 8. Display error if an Address Type is being added that already exists for the Wholesaler.

Business Rules
9. Display error if an Address Type is being changed to an Address Type that already exists for the Wholesaler.

Developer Notes
1. Each address type entered is placed into the address collection for the wholesaler. When the Address Types of File list is displayed, place a check in each address type where appropriate.
2. There are no historical records for the addresses. When an edit is done on an existing address the data is replaced within the database records.

1.3.3 Vendor List

The vendor list screen shows two lists of all vendors associated with the selected wholesaler. The Current Vendor List shows a list of all vendors that have an association with the selected wholesaler. The Current Vendor List (Formula) shows a list of all vendors that have an association with the selected formula wholesaler. Both data grids are the same. They are read-only, showing the vendor ID, name, address, city, local agency and vendor status. Only one control table is defined below as it applies to both data grids.

> Vendor Associations > Wholesalers > Vendor List

Wholesalers < 1 of 99 >
 Show All

Current Vendors					
Vendor ID	Vendor Name	Address	City	Local Agency ID	Status
<u>01009</u>	Smith's Groceries	42 Main Street	Eagle	19	Active
<u>01011</u>	Smith's Grocery and Pharmacy	101 West Avenue	Eagle	19	Active
<u>04019</u>	Smith's Market	2359 Colorado Drive	Avon	19	Active

Current Vendors (Formula)					
Vendor ID	Vendor Name	Address	City	Local Agency ID	Status
<u>01015</u>	Best Formula Vendor Around	6 W Cedar Court	Eagle	19	Active
<u>01016</u>	Third Best Formula Vendor Around	101 West Avenue	Eagle	19	Active
<u>04021</u>	Bottom of the list	12 Main Street	Avon	19	Active

Control	Description	
Wholesalers	This is the record selector for the wholesaler records.	
	Type	Record Selector
	Contents	Wholesaler Names
	Code ID	Wholesaler table lookup

Control	Description			
Show All	Determines records shown in Wholesalers record selector. Unchecked show active wholesalers. Check to expand the selection to all wholesalers (active and inactive). Defaults to unchecked.			
	Type	Check Box		
	Display Only	No	Calculated	No
Current Vendors	Data grid that displays all vendors associated with the wholesaler.			
	Type	Read-Only Data Grid		
	Display Only	Yes	Calculated	No
Vendor ID	The vendor's unique identifier. By clicking on the hyperlink the vendor is displayed within vendor management.			
	Format	Link	Calculated	No
	DB Column	Vendor.FFVendorID		
Vendor Name	The vendor's name.			
	Format	Text	Calculated	No
	DB Column	Vendor.StoreName		
Address	The street address where the vendor is located.			
	Format	Text	Calculated	No
	DB Column	Vendor.AddressStreetAddrLine1		
City	The city where the vendor is located.			
	Format	Text	Calculated	No
	DB Column	VendorAddress.City		
Local Agency ID	The local agency that is associated with the vendor.			
	Format	Text	Calculated	No
	DB Column	LocalAgency.FFLocalAgencyID		
Status	The vendor's current status.			
	Format	Text	Calculated	No
	DB Column	VendorStatus.VendorStatusCd		
	Code ID	VendorStatusCode table lookup		

Business Rules
<ol style="list-style-type: none"> 1. The first grid is populated with all vendors that are linked to the designated wholesaler. 2. The second grid is populated with all vendors that are linked to the designated formula wholesaler.

Business Rules

3. Address data displayed is the physical address data, if one exists. If no physical address exists, the mailing address is displayed; otherwise the next address type in the Sort Order of the Address Type Code is displayed.

Developer Notes

1. To display the Local Agency ID, look at the Local Agency ID that is stored in the Vendor.LA_ID, and then find the corresponding Local Agency ID on the LocalAgency table.
