## *Helping Low-Income Families and Local Communities in Arizona*

The Supplemental Nutrition Assistance Program (SNAP) offers nutrition benefits to participating clients, supports work, and provides economic benefits to communities. The SNAP brings Federal dollars into communities in the form of benefits which are redeemed by SNAP participants at local food stores. Increasing SNAP participation provides an immediate stimulus to local economies.

### **Increase in SNAP Participation Creates Substantial Economic Benefits**

Every \$5 in new SNAP benefits generates \$9.00 in total community spending.

The FY 2011 average monthly SNAP benefit was about \$295.25 per household, which is spent in local food stores.

### **FY 2009 SNAP Participation Data**

Total Eligible Participants	1,079,000	Actual Participants	762,000
Eligible Non-Participants	317,000	Participation Rate	71
Total Benefits Disbursed	1,223,845,635	Total Economic Activity	2,202,922,143
Additional Benefits with Full Participation	10,318,350	Additional Economic Activity with Full Participation	18,573,030

Because the majority of SNAP benefits are redeemed the month they are issued, SNAP acts as an immediate economic stimulus to struggling local economies. New SNAP benefits also generate additional economic activity as families are able to increase their overall food purchasing power.
