Helping Low-Income Families and Local Communities in South Carolina

The Supplemental Nutrition Assistance Program (SNAP) offers nutrition benefits to participating clients, supports work, and provides economic benefits to communities. The SNAP brings Federal dollars into communities in the form of benefits which are redeemed by SNAP participants at local food stores. Increasing SNAP participation provides an immediate stimulus to local economies.

Increase in SNAP Participation Creates Substantial Economic Benefits

Every \$5 in new SNAP benefits generates \$9.00 in total community spending.

The FY 2011 average monthly SNAP benefit was about \$285.56 per household, which is spent in local food stores.

FY 2009 SNAP Participation Data

Total Eligible Participants	804,000	Actual Participants	666,000
Eligible Non-Participants	138,000	Participation Rate	83
Total Benefits Disbursed	1,001,691,847	Total Economic Activity	1,803,045,325
Additional Benefits with Full Participation	4,352,520	Additional Economic Activity with Full Participation	7,834,536

Because the majority of SNAP benefits are redeemed the month they are issued, SNAP acts as an immediate economic stimulus to struggling local economies. New SNAP benefits also generate additional economic activity as families are able to increase their overall food purchasing power.
