Milk Vending Machines

This directory of key vending channel supplies and resources is provided by Dairy Management Inc.™ (DMI) which does not officially endorse or claim responsibility for any individual company or products listed.

Dixie-Narco 5529 "got milk?®" Vendor

- Has capacity for 360 packages. Refrigeration system is designed to cool the entire cabinet. Comes equipped with a health guard that keeps the product from being dispensed should the temperature of the cabinet exceed a safe level. Supports all available coin changers, bill acceptors and card-reading equipment available in today's market. Each column may be individually priced. Features space-to-sales function that ensures first-in, first-out product rotation. Provides full financial and product audit functions.

Contact Info: Dixie-Narco, Dixie Narco Boulevard, PO Drawer 719, Williston, SC 29853, 800.688.9090

Royal Vendor Milk Merchandiser

- Has the capability to be installed in either inside or outdoor locations and incorporates an industrial grade cabinet and door. Refrigeration cooling system utilizes the technology in the controller's software to monitor the cabinet temperature to ensure the quality of the product being vended. Can display product offering through the "Live Display" door or by utilizing the "Full Front" sign graphics. With a capacity of 370 one-pint packages that are vended first-in, first-out, along with utilizing its space-to-sales feature, you can assign individual columns to the desired select buttons to maximize product sales. Supports all of the standard currency peripherals - such as coin mechanisms, bill acceptors and card readers.

Contact Info: Royal Vendors, Inc., 201 Industrial Boulevard, Kearneysville, WV 25430, 800.321.8637

Dairy Merchandiser

- Vends a combination of milk packages and sizes. Has the capacity of up to 300 units and 12 different selections, each with individual pricing. The refrigeration system is engineered to cool the entire cabinet and incorporates a backlighted bubble-front panel. With the exception of the graphics on the front panel, it looks identical to a typical soft drink vendor.

Contact Info: U-Select-It, 8040 University, PO Box 1395, Des Moines, IA 50311, 800.247.8709

The Milk Machine

- Features a glass front with high impact graphics. Inside, five or six trays have the capacity for 240-288 bottles of milk. The cabinet is fully insulated with polyurethane foam and has a 1/2 HP refrigeration system that keeps milk at the perfect temperature. Drawer-like trays pull out to make loading fast and easy and to ensure first-in, first-out product rotation. Also features a Sensit® guaranteed product delivery system.
