

# Novo Dia Group, Inc Versado Overview

# Versado ?????

**versado en** : versed in,  
knowledgeable about, expert in;  
skilled in

# Versado™

- Online WIC certification assistance tool used to validate messages between TPP's and Issuers
- Used for both EBT WIC and SNAP certifications
- Saves Time and Resources
- Results available in real time and online
- Messages are broken out in an easy to understand "English" format

EBT Processor

Versado

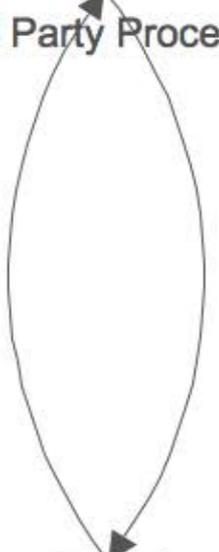

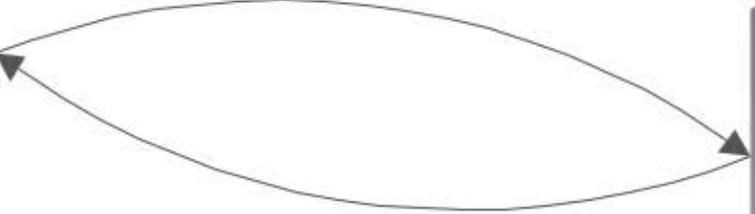

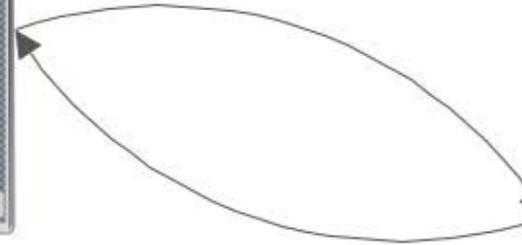

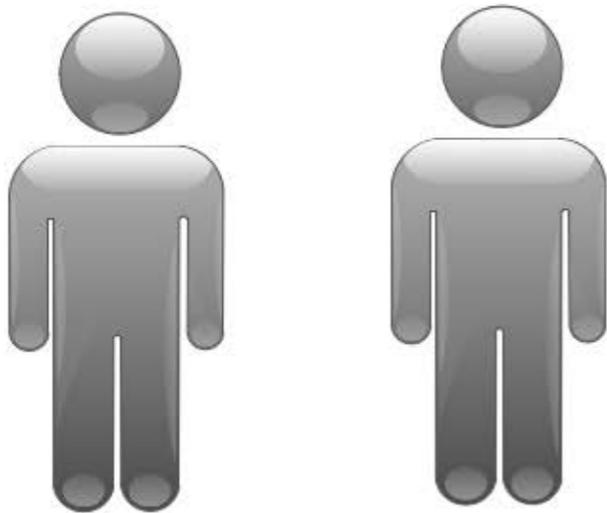

Third Party Processor

Versado Server logs and translates incoming and outgoing transactions

Remote users monitor test via secure internet connection

POS test device located in test lab

# Case Study: Michigan WIC Kroger Certification

- Versado reduced the certification test time by 50%.
- Versado removed the resource demand for an Issuer's developer resources.
- Versado reduced time and expenses incurred for the onsite test.
- Successful and passed certification test
- Total Number of Defects Discovered – 2

<b>Benefits of Versado</b>	
<b>Stakeholders</b>	<b>Benefits</b>
<b>State</b>	Provides the state with visibility into the online WIC integrated certification process without having to be onsite.
	Provides the state the ability to determine the readiness of an online WIC integrated retailer and Third Party Processor.
	Allows the state to focus on specific testing conditions and scenarios during the onsite certification test.
	Provides executive summary reports and dashboards.
<b>FNS</b>	Provides information that can be used as entrance criteria to determine if an onsite test is warranted.
	Provides executive summary reports and dashboards.
	Eliminates "interpretation" issues
	Notification and alerts when a test is started and completed.
	Reduces travel costs associated with onsite tests.
<b>TPP/Issuer</b>	Provides the TPP with a tool can be used during their integration testing with a retailer.
	Provides analysis and feedback of each test conducted with a pass/fail result.
	Provides the ability to test development enhancements prior to release.
	Reduces impact on issuer resources during the pre-certification tests.
	Ability to simulate a TPP message to an Issuer host.
	Ability to simulate an Issuer's host thus eliminating the need for an Issuer test environment.
